Experience

Sinclair Digital — Seattle, WA

Lead Product Designer — 2025—2026 — *Work under NDA*

Led end-to-end product design across a complex B2B platform, translating customer research, behavioral insights, and experimentation into intuitive workflows and product strategy

Simplified multi-step audience targeting, campaign creation, and analytics experiences, reducing complexity while improving usability and customer adoption

Established scalable design system patterns and AI-assisted design workflows that improved design consistency and accelerated collaboration across product and engineering

Presented product vision and interactive prototypes to executive leadership, aligning cross-functional teams around roadmap priorities before implementation

ATM Design — Remote

Product Design Consultant — 2014—2025

Led product strategy and UX design for startups across marketplaces, SaaS, sports, and consumer products, helping founders take products from concept to launch

Partnered directly with founders and engineering teams to validate ideas through research, prototyping, usability testing, and rapid iteration

Designed scalable user experiences balancing business goals with customer needs across web and mobile platforms

Delivered MVPs and growth-focused product improvements informed by customer feedback, analytics, and experimentation

Pogoseat — Venice, CA

Senior Product Designer — 2014

Led UX for a mobile live-event ticketing platform, redesigning ticket purchase and seat-upgrade experiences where speed, trust, and timing were critical to customer success

Reduced friction across high-pressure purchase flows by simplifying navigation, checkout, and upgrade decisions for fans attending live events

Partnered with product and engineering to rapidly prototype, test, and iterate new experiences as the company prepared for Series B funding

Designed for the unique logistical challenges of live events, balancing fan experience, venue constraints, and business objectives to improve conversion and successful upgrades

StackSocial — Venice, CA

Senior UI/UX Designer — 2013—2014

Joined as the company's first in-house product designer, helping establish the product design practice during a period of rapid growth

Led the company rebrand while designing the first iOS and Android marketplace experiences used by millions of customers

Created scalable UI patterns and reusable design components that supported consistent experiences across web and mobile products

Collaborated with product, engineering, and marketing to continuously improve customer acquisition and purchase experiences through iterative design

- **UI/UX Designer** — 2012—2013

Education

B.A., Sociology	University of California, Los Angeles
Certificate, HCI	Georgia Tech
Certificate, UX	Google

EXPERIENCE

Sinclair Digital | Lead Product Designer | Seattle, WA 2025 – 2026

- Led product discovery and design, turning stakeholder insights, user research, and testing into clearer product direction, better roadmap decisions, and more intuitive experiences
- Drove design direction for DriveAuto, a $50M+ B2B automotive martech platform, modernizing workflows across audience targeting, campaign creation, and performance analytics to reduce complexity and improve usability
- Established AI-assisted product design practices and scalable design system patterns, collaborating closely with product, research, and engineering teams to improve consistency, influence product priorities, and support faster development

TennisPal | Product Design Consultant | Remote 2023 – 2025

- Partnered with the CEO and TennisPal's product team to optimize core mobile user journeys and launch new features, increasing onboarding completion by 22% and improving match scheduling efficiency by 36%
- Combined usage data and user interviews to uncover retention opportunities and design targeted improvements to support engagement, paid subscriptions, and revenue growth

ATM Design | Product Design Consultant | Remote 2014 – 2025

- Led 0-to-1 product design for startups and founders, transforming early-stage ideas into validated concepts, MVPs, and scalable digital products across SaaS, marketplaces, e-commerce, sports, and consumer technology
- Partnered directly with founders, executives, and cross-functional teams from discovery through developer handoff, using research, prototyping, and usability testing to reduce uncertainty and ship products from concept to launch

EVRYBDY Design Group | UI/UX Design Consultant | Remote 2020 – 2023

- Delivered end-to-end UI/UX design across select client projects, translating complex requirements into intuitive digital experiences aligned with user needs and business goals
- Partnered with cross-functional teams to optimize user flows, prototype concepts, and deliver polished, developer-ready designs informed by user research

Pogoseat | Senior Product Designer | Venice, CA 2014

- Led the end-to-end design of Pogoseat's mobile ticketing and live-event commerce platform, simplifying time-sensitive purchase and seat-upgrade journeys to reduce friction, improve conversion rates, and increase successful upgrades

StackSocial | UI/UX Designer → Senior UI/UX Designer | Venice, CA 2012 – 2014

- Joined as StackSocial's first in-house designer and was promoted into a senior role, leading a company-wide rebrand, designing its first iOS and Android apps, and establishing scalable UI patterns as the startup grew to millions of users

Internet Brands | Web/Graphic Designer | El Segundo, CA 2010 – 2012

- Designed and optimized high-traffic B2C web experiences across Internet Brands' portfolio, improving usability, engagement, and conversion through iterative design and testing
