Experience

Sinclair Digital — Seattle, WA

Lead Product Designer — 2025—2026 — *Work under NDA*

Led end-to-end product design across a complex B2B platform, translating customer research, behavioral insights, and experimentation into intuitive workflows and product strategy

Simplified multi-step audience targeting, campaign creation, and analytics experiences, reducing complexity while improving usability and customer adoption

Established scalable design system patterns and AI-assisted design workflows that improved design consistency and accelerated collaboration across product and engineering

Presented product vision and interactive prototypes to executive leadership, aligning cross-functional teams around roadmap priorities before implementation

ATM Design — Remote

Product Design Consultant — 2014—2025

Led product strategy and UX design for startups across marketplaces, SaaS, sports, and consumer products, helping founders take products from concept to launch

Partnered directly with founders and engineering teams to validate ideas through research, prototyping, usability testing, and rapid iteration

Designed scalable user experiences balancing business goals with customer needs across web and mobile platforms

Delivered MVPs and growth-focused product improvements informed by customer feedback, analytics, and experimentation

Pogoseat — Venice, CA

Senior Product Designer — 2014

Led UX for a mobile live-event ticketing platform, redesigning ticket purchase and seat-upgrade experiences where speed, trust, and timing were critical to customer success

Reduced friction across high-pressure purchase flows by simplifying navigation, checkout, and upgrade decisions for fans attending live events

Partnered with product and engineering to rapidly prototype, test, and iterate new experiences as the company prepared for Series B funding

Designed for the unique logistical challenges of live events, balancing fan experience, venue constraints, and business objectives to improve conversion and successful upgrades

StackSocial — Venice, CA

Senior UI/UX Designer — 2013—2014

Joined as the company's first in-house product designer, helping establish the product design practice during a period of rapid growth

Led the company rebrand while designing the first iOS and Android marketplace experiences used by millions of customers

Created scalable UI patterns and reusable design components that supported consistent experiences across web and mobile products

Collaborated with product, engineering, and marketing to continuously improve customer acquisition and purchase experiences through iterative design

- **UI/UX Designer** — 2012—2013
